VAL VERDE UNIFIED SCHOOL DISTRICT

975 W Morgan Street • Perris, CA 92571 • 951.940.6100

The Val Verde Unified School District is excited to introduce our new *Powering Up Passion and Purpose* initiative.

Today's young adults are the future of our nation's economy and it's standing in a global workplace. Daily access to technology and the online resources that it offers is becoming more an expectation of both school and the workplace than a privilege. Technology at home and in the classroom enables students to learn 21st century skills to better prepare them for the future.

One of our goals this year is to expand the role of technology in the home and classroom for improved educational achievement. There are numerous benefits to students using technology in the home and the classroom including the ability to take notes, prepare assignments, use class tutorials, access textbooks and interact with peers and instructors in more effective ways.

Numerous devices including Chromebooks, tablets and laptops aid in preparing our students for the critical thinking required by California's new Common Core Standards.

There are many great devices to choose from but this can cause confusion. Below is a list of vendors and models that we have worked with directly and can confidently say they are well suited for today's 21st Century student offering quality at a reasonable price.

Device Recommendations • Visit the websites below for more details and pricing
